

## Certificate of conformity

**STERLING Separation Ltd** condensate cleaner models, **CS75, CSR150, CSR450, CSR1000, CSR2000, CSR3000, CS100IBC & CS200IBC** are certified by the manufacturer to be made in a safe and properly controlled manner, resulting in a product that is both safe and reliable in use, and which does not present any particular or foreseeable risk to the operator or the public provided the manufacturer's instructions are complied with.

These condensate cleaners are designed to provide an oil-in-water quantity no greater than approximately 5mg/l at the outlet at installation, and up to 15-20mg/l at end of life - assuming that the product has been correctly sized, installed, monitored and maintained in accordance with **STERLING's** operating instructions, and assuming that the unit is fitted to an air compressor system maintained to the standard required by the original compressor manufacturer, and with an oil carry-over of no greater than 5 parts per million (oil in delivered air)

**01 January 2021**
